EXPERIMENT-10

Internetworking with routers in CISCO PACKET TRACER simulator.

a) Design and configure a simple internetwork using a route

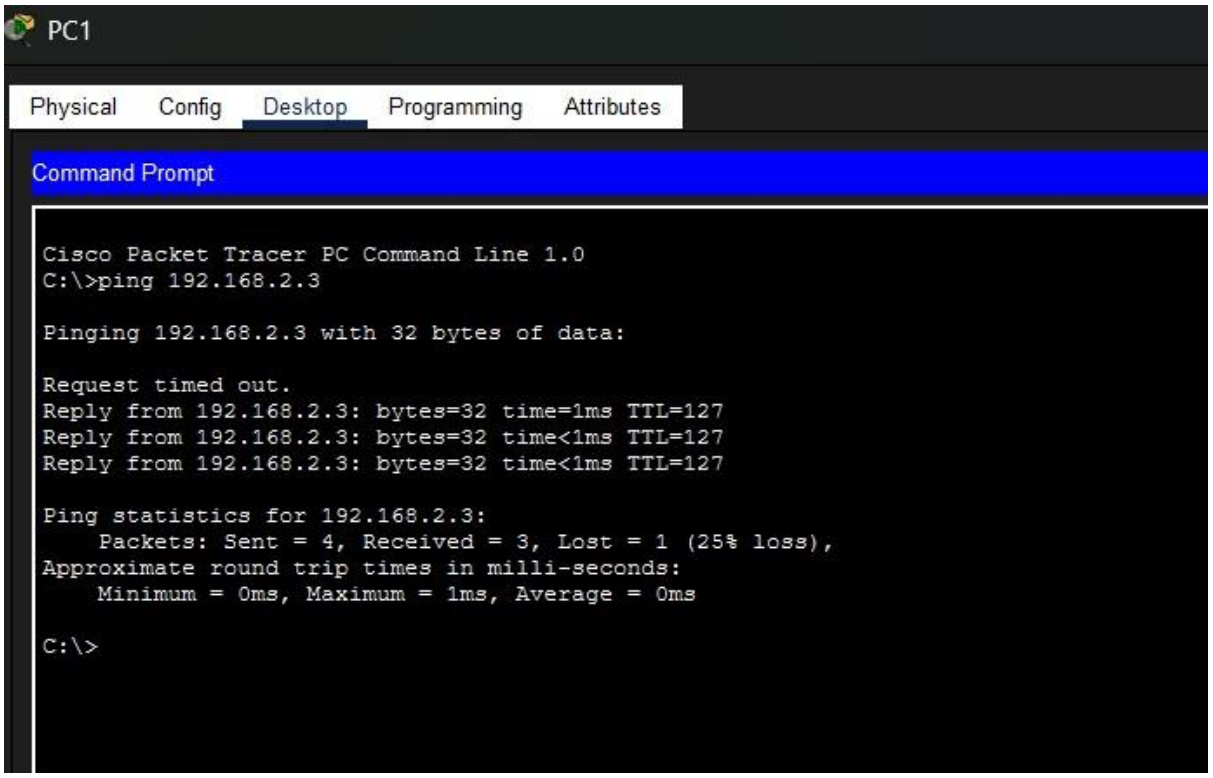

1. Design different networks (with 3 to 4 hosts) and connect via Router.
2. Allot static ip address to machines and router interfaces.
3. Perform simulation and trace how routing is done in packet transmission.

EXPERIMENT-10

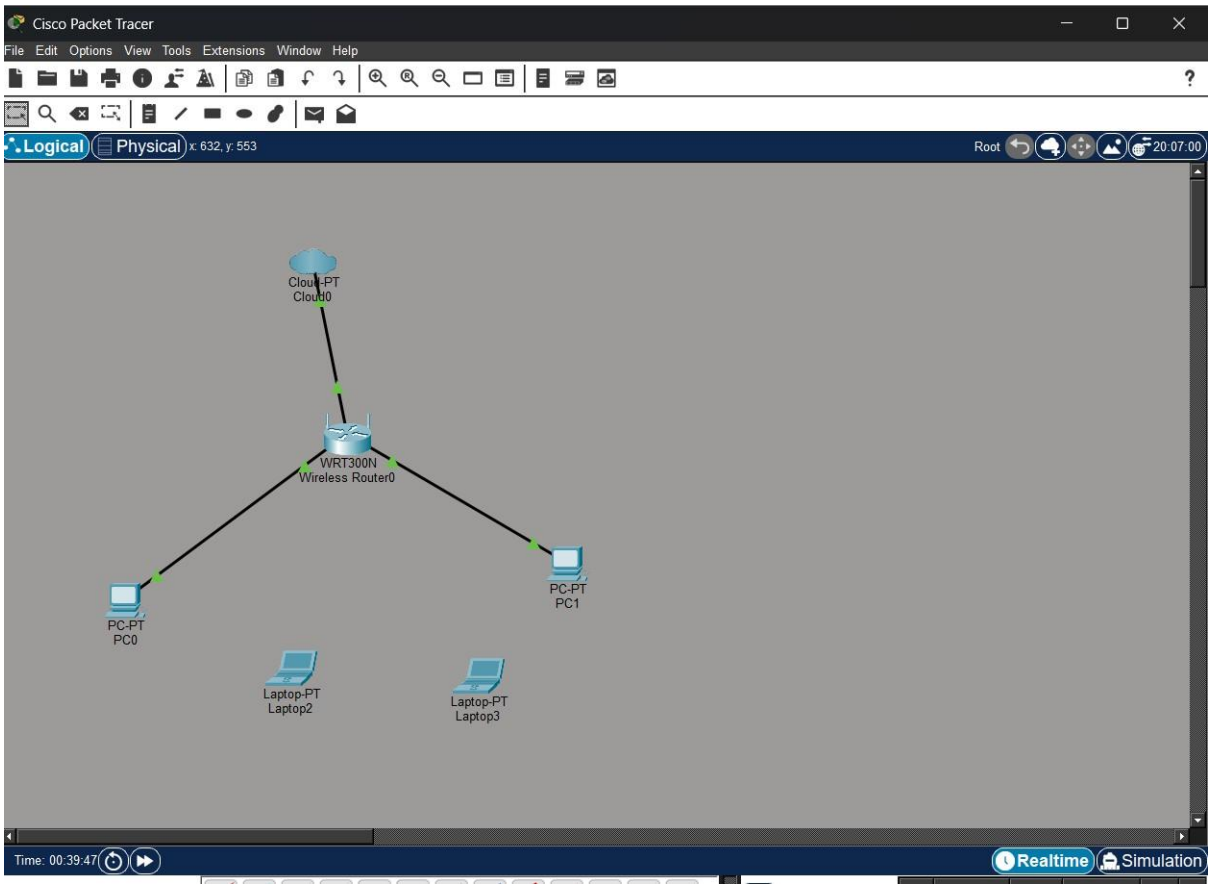

```
Router>enable
Router#configure terminal
Enter configuration commands, one per line.  End with CNTL/Z.
Router(config)#interface gigabitEthernet 0/0
Router(config-if)#ip address 192.168.1.1 255.255.255.0
Router(config-if)#
Router(config-if)#no shutdown
Router(config-if)#exit
Router(config)#interface gigabitEthernet 0/1
Router(config-if)#ip address 192.168.2.1 255.255.255.0
Router(config-if)#no shutdown
Router(config-if)#exit
Router(config)#end
```
