EXPERIMENT-14

14. | Write a code using RAW sockets to implement packet sniffing.

packet_sniffer.py

```
import socket
HOST = socket.gethostbyname(socket.gethostname())
sniffer = socket.socket(socket.AF_INET, socket.SOCK_RAW, socket.IPPROTO_IP)
sniffer.bind((HOST, 0)) sniffer.setsockopt(socket.IPPROTO_IP,
socket.IP_HDRINCL, 1)
print("Packet Sniffer Started")
print("Listening on:", HOST) print("Press
Ctrl+C to stop")
try:
   while True:
      data, address = sniffer.recvfrom(65535)
print("Source IP:", address[0])        print("Packet
Size:", len(data), "bytes")        print("-" * 40)
except KeyboardInterrupt:
   print("\nPacket Sniffer Stopped")
finally:
   sniffer.close()
```
